

Tutorial on Military Investigations

31 August 2020, Montreal, Quebec, Canada

In conjunction with ISASI Annual Seminar September 1st – 3rd

Objectives of Tutorial

This tutorial aims to have another gathering of international Military Accident Investigators to share knowledge on their respective capabilities, experiences, processes and procedures with a view to the development of future relationships and common practices. It follows the inaugural meeting of the European Military Air Safety Investigators Forum which took place April 2013, Military Air Safety Investigation meeting were held during ISASI 2013, ISASI 2016-2019 and the Military Aviation Safety Workshop April 2016 in Albuquerque (USA). ISASI's theme this year is "20/20 Vision for the Future". These forums/tutorials draw a growing number of military investigators from across Europe, Australia, North America and Asia seeking to share their safety lessons.

The other goal of linking this tutorial to the ISASI seminar is to benefit from the experience gained by the civil counterparts over the years. Participants to the tutorial are encouraged to register for the ISASI Seminar that will continue on September 1st to 3rd, 2020 in Montreal, Quebec, Canada.

The main outputs of the presentations and discussions of this workshop will also be presented during the ISASI plenary session.

Contributions to Tutorial

If you are interested in contributing to this tutorial, please send a short abstract to Stuart Oliver stuart.oliver622@mod.gov.uk and to Jim Roberts james.w.roberts3@boeing.com. The format of the presentations is flexible (no formal papers requested) in order to build an interactive programme on this specific topic.
